Education

San Diego State University

Bachelor of Science, Aerospace Engineering

- Dean's List (Spring 2023, 2024)

Skills and Competencies

- **Structural CAD & Design:** SolidWorks, CAD modeling, assemblies, engineering drawings, BOMs, design revisions, design for manufacturability
- **Analysis & Data:** MATLAB, Python, Excel, data analysis, performance trends, preliminary engineering calculations
- **Manufacturing & Testing:** Fabrication, assembly, prototyping, troubleshooting, validation, failure analysis, testing
- **Engineering Systems:** Mechanical structures, aerospace structures, vehicle systems, structural integration, reliability, serviceability
- **Documentation & Communication:** Technical writing, engineering reports, build documentation, project documentation, cross-functional collaboration

Projects

VTOL Quadcopter Biplane UAV Drone

January 2026 – Present

Manufacturing Lead

- Lead CAD design, manufacturing planning, fabrication support, assembly, testing, and documentation for a VTOL UAV platform with moving flight surfaces and integrated propulsion systems
- Create SolidWorks models, assemblies, engineering drawings, BOMs, and build documentation to support prototype development, fabrication, and design reviews
- Evaluate manufacturability, structural fit, reliability, weight, serviceability, and build quality while balancing design requirements with fabrication constraints
- Identify build and integration issues, support troubleshooting, and implement design revisions to improve prototype reliability, repeatability, and assembly quality

AZTEC ELECTRIC RACING (FSAE)

October 2022 – Present

Aerodynamics Team Member (2022-2024), Energy Storage Team Member (2024-Present)

- Design, fabricate, assemble, test, and troubleshoot mechanical and structural components for a high-performance Formula SAE electric race car
- Support vehicle layout, mounting hardware, aerodynamic structures, energy storage packaging, and subsystem integration with attention to fit, reliability, serviceability, and safety
- Create CAD models, engineering drawings, BOMs, and technical documentation for fabricated components, assemblies, and design revisions
- Collaborate across electrical, structures, aerodynamics, and energy storage teams to support project documentation, design decisions, integration planning, and build readiness
- Participate in failure analysis and iterative redesign efforts, contributing to an estimated 30% reduction in recurring component failures

SAN DIEGO STATE UNIVERSITY ROCKET PROJECT

October 2023 – Present

- Support design, fabrication, assembly, integration, and testing of rocket hardware and mechanical structures in an aerospace-focused engineering environment

UNDERGRADUATE RESEARCH – AEROSPIKE NOZZLE

September 2025 – Present

- Support propulsion research focused on aerospike nozzle performance through data analysis, documentation, and evaluation of performance trends
- Use MATLAB, Python, Excel, and Microsoft Office to process data, document findings, and communicate technical results for ongoing research work
